

Automatic Liquid Filling Machine

This automatic filling machine is designed for precise and efficient liquid filling operations. It features stainless steel construction, multiple filling heads, a PLC, and a user-friendly touchscreen interface.

Overview

High-Efficiency Liquid Filling Solution

This automatic liquid filling machine is engineered for precision and efficiency in high-volume production environments. Constructed with durable stainless steel, it ensures hygiene and long-term reliability for various packaging applications. The system features a programmable logic controller (PLC) and an intuitive touchscreen interface, allowing for seamless operation and precise parameter adjustments. Integrated with a conveyor system, it provides automated, versatile filling cycles suitable for a wide range of liquids and bottle sizes.

Technical Specifications

Material	Stainless Steel
Control System	Programmable Logic Controller (PLC)
Interface	Touchscreen
Conveyor System	Yes

Safety & Compliance

Safety Features	Emergency Stop, Protective Enclosure
