

Automatic Liquid Filling Machine

This automatic liquid filling machine is designed for quantitative filling of various liquids. It features a control panel with a display and stainless steel construction, making it suitable for packaging applications in diverse industries.

Overview

Precision Liquid Filling Solution

The YBJ-4 (XP-200) is an automatic liquid packaging machine engineered for high-precision quantitative filling. Constructed with durable stainless steel, it is designed to meet the rigorous demands of industrial packaging environments. This unit features an intuitive control interface and essential safety mechanisms, making it a reliable asset for streamlined production lines.

Technical Specifications

Model Number	YBJ-4 (XP-200)
Filling Type	Quantitative
Machine Category	Automatic Liquid Filling Machine

Construction & Safety

Construction Material	Stainless Steel
Safety Features	Emergency Stop, Control Panel
