

Automatic Liquid Sachet Filling Machine

This automatic liquid filling machine is designed for packaging various liquids into pouches. It features a vertical form-fill-seal (VFFS) mechanism, ensuring precise filling and sealing.

Overview

Automatic Liquid Sachet Filling Machine

This automatic liquid sachet filling machine is a versatile packaging solution designed for efficiency and precision. It utilizes a plunger pump metering system to handle liquids with low fluidity, such as shampoo, oils, and sauces. Constructed from durable stainless steel, the machine features an adjustable design capable of creating various bag types, including three-side and four-side seals, making it suitable for diverse industrial packaging needs.

Technical Specifications

Measurement Method	Plunger pump metering
Measurement Range	100 ml
Packing Speed	60 bag/min
Total Power	1100 W

Bag Specifications

Bag Width Range	30-100mm
Bag Length Range	30-120mm
Sealing Options	3-side seal, 4-side seal, Back seal

Features

Suitable Materials

- Shampoo
- Lotion oil
- Soy sauce
- Jam
- Honey

Construction Material	Stainless steel
