Overview

Integrated Molasses Packaging Solution

This comprehensive, automated packaging line is specifically engineered for the tobacco honey and molasses processing industry. The system manages the entire workflow, from bag forming, filling, and sealing to cartoning and final cellophane over-wrapping. Designed for high efficiency and precision, it features an integrated mixer in the hopper to ensure consistent product flow and an easy-wash system for rapid flavor changes.

Key Features

Core Capabilities

Bag Forming, Filling & Sealing, Cartoning, Cellophane Over-wrapping, Easy Washing System, Integrated Mixer

Technical Specifications

Machine Technical Parameters

Model	Filling Range	Power	Weight
SR-FSM-150II/250II	30-150ml	220V 50Hz 1.3kW	350kg
SR-ZJH-80D	Single box	380V 50Hz 1.5kW	1200kg
SR-BT2000A	Single box	220V 50Hz 0.75kW	880kg
SR-BT2000C	Multiple boxes	220V 50Hz 2.2kW	500kg

Compatible Packaging Materials

- Heated lamination
- Nylon/PE
- PET/PE
- Paper box
- Double side heatable BOPP
