Product Overview

Versatile Automated Packaging Solution

The FSK-1500 is a highly capable automatic packaging machine designed to streamline production lines for irregular solids, powders, and ointments. It automates the entire packaging workflow, including bag making, measuring, filling, sealing, cutting, and counting. With advanced features like nitrogen filling and M-shape bag compatibility, it offers flexibility for diverse industries including food, beverage, and pharmaceuticals.

Technical Specifications

Max Filling Range	1500 ML
Construction Material	Stainless Steel
Standards Compliance	GMP Standard
Control System	American Intel Computer with Digital Interface

Operational Capabilities

Compatible Packaging Materials

- PET/Plated AL/PE
- PET/PE
- NYLON

Key Features

Anti-pollution Device • Dustproof System • Nitrogen/Air Filling • Easy Open System • M-Shape Bag Support

Suitable Products

Washing Powder, Coffee, Tea, Sugar, Peanut, Oatmeal, Inflation Foodstuffs, Ointments

Optional Add-ons

Available Upgrades

- Ink Printer
- Conveyor System
