Overview

Versatile Tea Packaging Solution

This automatic tea bag packaging machine offers a comprehensive 5-in-1 solution designed to streamline the production process. By integrating feeding, weighing, filling, sealing, and cutting into a single automated workflow, it significantly reduces labor costs while maintaining high precision. Built with durable stainless steel and high-quality components like Panasonic PLC and servo motors, this machine ensures consistent, 24-hour continuous operation with a high yield rate.

Performance & Efficiency

Operational Capabilities

24 hours

Continuous Working

98 %

Product Yield Rate

Supported Packaging Types

- Feeding
- Weighing
- Filling
- Sealing
- Cutting

Technical Specifications

Key Components	Panasonic PLC, Servo Motor, Mixer, Vibrator, Air-exhausting device
Material	Stainless Steel

Application

Versatility

Multi-function • High-precision • Retail-ready
