Overview

High-Efficiency Multi-Head Packaging Solution

This automatic multi-head weigher packaging machine is a versatile, all-in-one solution designed to integrate weighing, feeding, filling, and bag making into a single, seamless process. Engineered for high accuracy and consistent performance, it is ideal for manufacturers looking to streamline their production lines. The system is constructed for durability and hygiene, ensuring reliable operation across a wide range of granular, powder, and bar-shaped materials.

Technical Capabilities

Compatible Pouch Styles

- Pillow bags
- Gusseted bags
- Stand-up pouches

Weighing System

Ten-head multi-head weigher

Automation Features

PLC Control, Automated Weighing, Automated Filling, Automated Sealing, Automated Cutting

Applications

Industry Applications

- Snack Foods
- Frozen Foods
- Pet Foods
- Small Hardware
- Daily Chemical Materials

Commonly Packed Products

Melon Seeds • Almonds • Pistachios • Pine Nuts • Candy • Jelly • Legumes

Suitable Materials

Granular, Bar, Powder

Construction & Design

Construction Material

Stainless Steel

User Interface

User-friendly digital control panel for parameter adjustment
