Overview

Commercial Juice Extraction

This automatic orange juice extractor is engineered for high-efficiency commercial environments, including juice bars, restaurants, and cafes. Built with durable stainless steel, it features a transparent housing for process visibility and a large-capacity feeding basket for continuous operation. The system is designed for both ease of use and rigorous safety, ensuring consistent juice quality while simplifying daily maintenance.

Performance

Extraction Speed

22 oranges/min
Minimum Output

30 oranges/min
Maximum Output

Cost Efficiency

Most cost-effective

Safety & Operation

Safety Features

- Automatic shut-off when cover is removed
- Integrated safety cut-off switch

Operational Benefits

Easy to Operate, Easy to Clean

Design & Construction

Key Design Elements

- Transparent juicing chamber
- Large capacity orange holding basket
- Automatic feeding mechanism
- Waste collection system
- Dispensing tap

Construction

Stainless steel
