Product Overview

Commercial Juice Extraction Solution

This automatic orange juice extractor is engineered for high-efficiency commercial environments, including restaurants, cafes, and juice bars. The system features an automated fruit basket that eliminates the need for manual placement, streamlining the juicing process significantly. Constructed with food-safety grade materials, it ensures both durability and hygiene for high-volume operations.

Operational Features

Key Features

- Automatic fruit feeding system
- Easy disassembly for cleaning
- Low noise operation
- High-quality extraction mechanism

Usage Requirements

Requires fresh oranges as input; machine handles the washing and extraction process automatically.
