

Automatic Overwrapping Machine

This automatic overwrapping machine is designed for high-speed packaging applications. It features a stainless steel construction, adjustable conveyor, and PLC for customized operation.

Product Overview

Professional Overwrapping Solution

This automatic overwrapping machine is specifically engineered for pharmaceutical, soap, toothpaste, food, and audio disc production environments. It utilizes BOPP and PVC film to efficiently bundle small boxes through automated feeding, stacking, forming, and sealing processes. Designed for versatility and speed, the machine ensures a high-quality, artistic finish with options for anti-fake linear integration.

Performance & Technical

Sealing Technology	Three-pair sealing plates, Temperature control, Servo-driven cutting, Color mark detecting, Fixed-length cutting
Changeover Time	15 minutes
Max Changeover Time	20 minutes

Operation & Features

Operational Features

- Servo system for accurate film cutting
- Visible counters and rulers for easy adjustment
- Fast pull and plug devices for quick setup
- Anti-fake linear capability
- Automatic product feeding and stacking

Construction

Stainless Steel

Control System

Programmable Logic Controller (PLC)
