

Automatic Paper Cup Forming Machine

This fully automatic paper cup forming machine is designed for efficient, high-volume production. The machine integrates paper feeding, heating, forming, and cup ejection into a single automated system.

Overview

High-Efficiency Cup Production

This fully automatic paper cup forming machine is engineered for high-volume production environments. It seamlessly integrates essential processes including paper feeding, heating, forming, and cup ejection into a single, streamlined system. Designed with robust construction and precise control mechanisms, it ensures consistent output and reliability for various paper cup sizes and styles.

Technical Specifications

Automation Level

Fully Automatic

Integrated Processes

- Paper feeding
- Heating
- Forming
- Cup ejection

Model Number

JBZ-12H

Operational Features

Robust Construction, Precise Control, User-Friendly Interface
