

Automatic Paper Cup Forming Machine

This automatic paper cup forming machine is designed for high-speed production of disposable paper cups. It integrates automatic paper feeding, sealing, bottom punching, heating, knurling, and cup ejection.

Overview

High-Efficiency Paper Cup Production

This automatic paper cup forming machine is engineered for high-speed, reliable production within the food and beverage packaging industry. It seamlessly integrates essential processes such as automatic paper feeding, sealing, bottom punching, heating, knurling, and cup ejection into a single streamlined workflow. Controlled by an advanced PLC system, it ensures precision and consistent output quality, making it an ideal solution for mass production needs.

Technical Specifications

Model Number	JBZ-S12
Control System	Programmable Logic Controller (PLC)

Operational Features

Integrated Processes

- Automatic paper feeding
- Sealing
- Bottom punching
- Heating
- Knurling
- Cup ejection

Adjustable Parameters	Cup diameter, Cup height, Bottom size
-----------------------	---------------------------------------

Safety & Compliance

Safety Features

Emergency stop buttons • Protective enclosures
