

Automatic PET Bottle Blowing Machine

This automatic PET bottle blowing machine is designed for high-speed production of PET bottles up to 600ML. It features an integrated preform feeding system, infrared heating, and a user-friendly control panel.

Overview

High-Efficiency PET Bottle Production

The Automatic PET Bottle Blowing Machine is engineered for high-speed, reliable production of PET containers. It features an integrated preform feeding system and precise infrared heating technology to ensure consistent quality. Designed for versatility, it is an ideal solution for manufacturing beverage bottles, edible oil containers, and various other PET packaging applications.

Technical Specifications

Automation Level

Fully Automatic

Model Number

CSD-AL10-600ML

Maximum Bottle Capacity

600 ML

Key Features

Core Features

- Integrated preform feeding system
- Infrared heating technology
- User-friendly control panel

Applications

Suitable Applications

Beverage Bottles, Edible Oil Containers, PET Packaging
