

Automatic PET Bottle Blowing Machine

The Automatic PET Bottle Blowing Machine is designed for high-speed, efficient production of PET bottles. This machine features an automated preform loading system, precise temperature control for optimal material processing, and a robust clamping mechanism for consistent bottle formation.

Overview

High-Efficiency PET Production

The Automatic PET Bottle Blowing Machine is engineered for high-speed, reliable production of PET containers. Featuring an automated preform loading system and precise temperature controls, it ensures consistent bottle formation and quality. This versatile machine is built for durability and ease of operation, making it an ideal solution for beverage and food packaging industries.

Technical Specifications

Machine Type	Automatic PET Bottle Blowing Machine
Application	CSD, Beverage, Food Packaging
Model ID	AB5-1.25L

Key Features

Automation Capabilities

- Automated preform loading system
- Precise temperature control
- Robust clamping mechanism
- User-friendly control panel

Performance Highlights

1.25 L

Max Bottle Capacity
