

Automatic PET Bottle Blowing Machine

This automatic bottle blowing machine is designed for the production of PET bottles and containers. It offers precise control over bottle dimensions and material distribution, making it suitable for high-volume production.

Overview

High-Efficiency PET Bottle Production

This automatic bottle blowing machine is engineered for high-volume production of PET bottles and containers. It features a multi-cavity mold system that ensures precise control over dimensions and material distribution, resulting in consistent quality with minimal waste. Designed with advanced heating and cooling systems, the machine optimizes performance while maintaining energy efficiency for industrial applications.

Technical Specifications

Rated Current

90 A

Rated Current

Production Capabilities

- High-volume production capacity
- Multi-cavity mold system
- Precise material distribution control
- Consistent bottle quality output

Features

Suitable For

Various Bottle Sizes • Various Bottle Shapes • PET Containers

Key Features

Automatic Operation, Energy Efficient, Advanced Heating System, Advanced Cooling System, User-Friendly Interface
