

Automatic PET Bottle Blowing Machine

This automatic PET bottle blowing machine produces PET bottles in various shapes and sizes. It is designed for high-volume production of plastic bottles suitable for beverage, food, and other packaging applications.

Overview

High-Efficiency PET Bottle Production

This automatic PET bottle blowing machine is engineered for high-volume production of plastic bottles in various shapes and sizes. Featuring an integrated preform feeding system with a conveyor and hopper, the machine ensures consistent throughput for beverage, food, and industrial packaging applications. Its enclosed processing stations and intuitive control panel provide both operational safety and precise performance for demanding manufacturing environments.

Technical Specifications

Model Designation	350R
Machine Type	Automatic PET Bottle Blowing Machine
Industry Application	Beverage Packaging, Food Packaging, Industrial Packaging

Features

Feeding System

- Automated conveyor system
- Integrated preform hopper

Safety Features

Enclosed Processing Stations • Protective Transparent Doors
