

Automatic PET Bottle Blowing Machine

This automatic machine is designed for producing PET bottles through a two-step process. It includes preform heating and bottle blowing, with adjustable parameters for temperature and pressure.

Overview

High-Efficiency PET Bottle Production

This automatic PET bottle blowing machine utilizes a reliable two-step process, combining precise preform heating with efficient bottle blowing technology. Designed for versatility, it is ideal for manufacturing a wide range of containers, including water bottles, beverage bottles, and cosmetic packaging. The system features an intuitive control panel for easy parameter adjustment, ensuring consistent quality and operational ease.

Technical Specifications

Process Type	Two-step (Preform heating and blowing)
Frame Material	Stainless Steel
Model Identifier	CSD-2P

Features

Safety Systems	Integrated Safety Guards, Emergency Stop, Operational Safety Interlocks
----------------	---

Applications

Suitable Applications

- Water Bottles
- Beverage Containers
- Cosmetic Packaging
