

# Automatic Pet Food Pellet Production Line

This automatic production line is designed for efficient creation of pet food pellets. It processes a range of ingredients into various shapes and sizes suitable for different pets.

## ADDITIONAL IMAGES

## Product Overview

Complete automated line from raw material processing to final packaging.

### High-Performance Pet Food Production

This automatic pellet pet food production line is designed to enhance market competitiveness by delivering high-quality, nutritionally scientific food products. Featuring advanced extrusion technology, the system allows for the creation of various pellet shapes, unique textures, and cored-filling pet treats. The line is engineered for ease of assimilation and consistent manufacturing standards, making it an essential solution for modern pet food producers.

## Technical Specifications

Precision machinery designed for continuous pellet production and high output efficiency.

### Processing Stages

- Mixing
- Extrusion
- Drying
- Flavoring
- Packing

### Available Capacity

150kg/h, 240kg/h, 500kg/h, 1ton/h, 2ton/h

## Materials and Versatility

Versatile production capability for various pellet shapes and sizes for cats and dogs.

### Common Raw Materials

- Soya flour
- Bone powder
- Corn flour
- Fish meal

### Shaping Flexibility

Variety of shapes available by adjusting the extruder mould.
