Product Overview

Advanced Hydration System

This automatic pet water dispenser utilizes a terrace-style circulating filtration system to provide high-oxygen, fresh water for pets. Designed with a 6-degree ergonomic tilt to protect your pet's neck, it combines convenience with health-focused features like UV purification and multi-stage filtration. The split-barrel design ensures water and electricity separation for safety, while intelligent operation modes optimize energy efficiency and pump longevity.

Design & Ergonomics

Tilt Angle	6 degrees
Tank Design	Round flanging for easy removal and scratch prevention
Water Level Monitoring	Transparent water level window

Filtration & Safety

Filtration System

- Pre-foam filter (pump protection)
- Deep filtration (removes residual chlorine and microorganisms)
- UV purification

Safety Features	Water/Electricity Separation, Water Shortage Alert, Filter Replacement Reminder
