

Automatic Pet Water Dispenser with Gravity Feed

This automatic pet water dispenser utilizes a gravity feed system to ensure a continuous supply of fresh water for small animals. Constructed from durable, food-grade plastic, the dispenser features a detachable water bottle and a wide base for stability.

Product Overview

Continuous Hydration for Small Pets

This automatic pet water dispenser utilizes a reliable gravity feed system to ensure a constant supply of fresh water for small animals. Constructed from high-quality, food-grade plastic, the unit features a stable wide base and a transparent reservoir for easy monitoring of water levels. Its functional and aesthetically pleasing design makes it a perfect solution for rabbits, hamsters, guinea pigs, and other small pets.
