Overview

Automated Wrap-Around Packaging Solution

The PM-GT-P is an advanced automatic wrap-around case packer designed to streamline end-of-line packaging processes. By automating bottle infeed, cardboard supply, inspection, and sealing, this machine enables manless production and significantly improves efficiency. Its robust design integrates seamlessly into existing production lines, utilizing high-precision controls for consistent, reliable performance.

Technical Specifications

Operation Type

Pneumatic • Servo Driven • Fully Automatic

Control System

Siemens PLC, Schneider Touch Screen

Construction Material

Stainless Steel

Operational Features

Key Machine Components

- Conveyor system with inspection
- Automatic cardboard supplying system
- Automatic bottle dropping mechanism
- Cardboard folding mechanism
- Lateral carton pressing mechanism
- Top carton pressing mechanism

Safety & Compliance

Emergency Stop, Safety Guards, Automatic Inspection

Adaptability

Adjustable top pressing mechanism suitable for different carton sizes
