

Automatic Pill Production Machine

This machine offers both manual and PLC control options, sharing similar modes and principles. It automates pill production, guaranteeing uniformity in size, shape, and quality.

Overview

High-Efficiency Pill Production

This fully automatic pill production machine is engineered for the pharmaceutical industry, offering reliable and consistent manufacturing capabilities. Designed for continuous operation, it ensures uniformity in pill size and shape while maintaining high hygiene standards. With a compact footprint and adjustable production parameters, it is an ideal solution for optimizing pharmaceutical manufacturing workflows.

Performance Metrics

Production Capacity

150 kg/h
Max Output

Pill Weight Range	1g - 11g
-------------------	----------

Technical Specifications

Motor Power	7.35 KW
Heating Jacket Power	380V 50Hz
Cooling Water Circulatory Power	380V
Cool Water Jacket Diameter	Æ120-Æ150

Physical Dimensions

Total Weight	850 kg
Dimensions (LxWxH)	1800 x 920 x 1500 mm
