Product Overview

Professional Automatic Pipe Threading

This high-performance automatic pipe threading machine is engineered for precision and efficiency in plumbing, construction, and industrial settings. It features an integrated auto-type threading mechanism and a self-centering chuck to ensure consistent, accurate thread quality across various pipe sizes. With a robust design and automated oiling system, it provides a dependable solution for high-volume piping projects.

Technical Specifications

Operation Mode

Automatic

Threading Capacity

1/2" to 3"

Key Features

Core Functional Features

- Self-centering chuck for secure pipe clamping
- Adjustable die heads for versatile pipe sizing
- Integrated oiling system for extended die life
- High-performance motor for industrial reliability
- Auto-type threading mechanism

Recommended Applications

Plumbing, Construction, Industrial Piping
