

Automatic Plastic Bag Making Machine

This high-speed machine is designed for efficient production of various plastic bag types. It features dual unwinding stations, precise sealing and cutting mechanisms, and an advanced control system.

Overview

High-Speed Bag Production Solution

This high-speed automatic plastic bag making machine is engineered for the efficient production of various bag types. It features dual unwinding stations, precise sealing and cutting mechanisms, and an advanced control system to ensure optimized performance. Designed for versatility, it handles a wide range of film thicknesses and bag dimensions, making it an ideal choice for diverse packaging applications.

Machine Features

Core Capabilities

High-Speed Operation, Dual Unwinding Stations, Precision Sealing, Advanced Control System, Versatile Bag Dimensions

Safety and Construction

Safety & Durability

Safety Integrated • Durable Construction • Long-lasting Operation
