

Automatic Plastic Bag Making Machine

This machine is designed for efficient and precise production of plastic bags, with advanced automation for film feeding, sealing, and cutting. It is suitable for producing flat bags, T-shirt bags, and garbage bags, offering high output and minimal material waste.

Overview

High-Speed Bag Production Solution

This automatic plastic film bag making machine is engineered for high-speed, efficient production suitable for small to medium-sized manufacturing facilities. It features advanced automation capabilities that allow for unattended operation, significantly increasing production throughput while reducing waste. With a robust design, it ensures stability during continuous operation and simplifies the bag-making process from film feeding to final processing.

Performance

Production Speed

250 bags/min

Max Speed

Operational Mode

High-Speed, Unattended Operation, Automatic

Technical Features

Material Handling Features

- Evacuation material volume membrane boost
- Anti-elongation technology
- Automatic outage lamination
- Simplified manual membrane pickup

Ideal For

Small Bag-Making Factories • Medium Bag-Making Factories
