

Automatic Plastic Bottle Blowing Machine

This automatic bottle blowing machine is designed for high-volume production of plastic bottles. It features a programmable logic controller (PLC) for precise control and adjustable heating zones for optimal material processing.

Product Overview

High-Efficiency Bottle Production

This automatic bottle blowing machine is engineered for high-volume plastic bottle manufacturing. It integrates precise programmable logic control with adjustable heating zones to ensure optimal material processing and consistent quality. Designed for efficiency, the system features a high-speed clamping mechanism and an intuitive interface for real-time monitoring and parameter adjustments.

Technical Features

Control System	Programmable Logic Controller (PLC)
Heating Configuration	Adjustable heating zones
Clamping System	High-speed clamping

Operational Capabilities

User Interface

- Parameter setting
- Real-time monitoring

Production Focus	High-volume, Energy efficient, Easy maintenance
