

Automatic PVC Label Sleeve Shrinking Machine

This machine applies circular labels to PET bottles and uses heat to shrink the label, securing it in place. Its compact structure suits diverse production lines, with modular design and motorized height adjustment for easy material changes.

Overview

High-Speed Labeling Solution

The Automatic PVC Label Shrink Sleeve Labeling Machine with Steam Shrinking System is engineered for high-speed, precise application of labels onto diverse container shapes. By integrating both the labeling and steam shrinking processes, this system ensures a seamless, wrinkle-free finish on every unit. Built with robust stainless steel, it is designed for durability and efficiency in demanding production environments such as food, beverage, pharmaceutical, and cosmetic industries.

Technical Specifications

Model	SLM-150
Construction Material	Stainless Steel
Labeling System	Steam Shrinking

Certifications

Certifications	ISO 9001, CQC
----------------	---------------

Applications

Suitable Industries

- Food & Beverage
- Pharmaceutical
- Cosmetic
