

Automatic PVC Pipe Cutter

This hand tool is designed for cutting PVC pipes up to a maximum diameter of 42mm. Its automatic mechanism simplifies the cutting process and its durable construction ensures a longer lifespan.

Overview

Professional PVC Pipe Cutting Solution

This automatic PVC pipe cutter is engineered for precision and durability in demanding work environments. Designed to handle pipes up to 42mm in diameter, it features a high-quality blade mechanism that ensures clean, effortless cuts every time. Its robust construction is built for an extended lifespan, making it an essential, reliable tool for professional plumbing and construction applications.

Technical Specifications

Maximum Cutting Diameter

42 mm

Max Capacity

Model Number	JRF-PC-207
Mechanism Type	Automatic

Features

Key Benefits

- High-quality precision blade
- Clean and efficient cutting
- Durable construction for long service life
- Automatic operation for ease of use

Suitable For	Professional Use, DIY Projects, PVC Piping
