Overview

Professional Automatic Rebar Tying Solution

This automatic rebar tying machine is designed to streamline construction workflows by automating the binding of steel reinforcing bars. Capable of working 1.5-8 times faster than manual methods, it significantly increases productivity while reducing operator fatigue. The cordless, battery-powered design ensures mobility on the job site, while the micro-control system delivers consistent, firm, and reliable ties every time.

Performance

Key Performance Metrics

14.4 V Operating Voltage	8 x faster Speed Multiplier
------------------------------------	---------------------------------------

Turns per Tie	2/3 turns (standard models), 3/4 turns (BEXDL-510)
----------------------	--

Certifications

Compliance & Standards

CE • SGS • ISO 9001

Technical Specifications

Model Specifications

Model	Ties Per Coil
BEXDL-20	260
BEXDL-40	160
BEXDL-220	260
BEXDL-400	160
BEXDL-510	100

Features

Key Advantages

- High-speed automated tying
- Battery-powered cordless operation
- Ergonomic design to minimize fatigue
- Safe low-voltage electrical system
- Versatile adaptability for various bar diameters
