

Automatic Rolling Cooking Pot

This automatic rolling cooking pot features a unique 360° rotating design for even cooking. It has a non-stick pot for easy cleaning and offers multiple cooking functions including frying, roasting, and dehydrating.

Product Overview

Innovative 360° Culinary Solution

The Automatic Rolling Cooking Pot offers a versatile 6-in-1 cooking experience, enabling users to fry, stir-fry, roast, grill, bake, and dehydrate with ease. Featuring a unique 360-degree rotating mechanism, it ensures consistent results by automatically turning food during the cooking process. Designed for professional kitchens and home use, this appliance combines high-efficiency carbon heating with a durable, non-stick cooking chamber.
