

Automatic Rotary Bottle Filling Machine

This automatic bottle filling machine is designed for high-speed liquid packaging applications. It features a rotary filling system with multiple filling heads for efficient and precise volume dispensing.

Product Overview

High-Performance Rotary Filling

This automatic rotary bottle filling machine is engineered for high-speed liquid packaging applications, ensuring precision and efficiency. Built with durable, hygienic stainless steel components, it is suitable for a wide range of beverages including water and juice. The system integrates advanced PLC control and safety interlocks, making it a reliable solution for modern production lines.

Technical Specifications

Filling System	Rotary
Control System	Programmable Logic Controller (PLC)
Construction Material	Stainless Steel

Operational Capabilities

Adjustable Parameters

- Bottle Size
- Fill Volume

Compatible Liquids	Water, Juice, Beverages
Compatible Container Types	PET Bottles, Glass Bottles

Safety & Maintenance

Safety Features

- Safety Enclosures
- Safety Interlocks

Maintenance Profile

Easy Cleaning • Low Maintenance
