

Automatic Rotary Can Filling and Sealing Machine

This automatic machine fills and seals cans at high speed. It is made with stainless steel for durability and features a rotary filling system for accurate filling and minimal waste.

Overview

High-Efficiency Rotary Filling and Sealing

This automatic rotary can filling and sealing machine is engineered for high-speed production lines, specifically optimized for carbonated beverages like colas, soft drinks, and iced teas. Constructed from durable, hygienic stainless steel, it features a precise rotary filling system that minimizes spillage while ensuring consistent volume control. The integrated sealing mechanism provides airtight closures to maintain product freshness, making it an ideal solution for small to medium-sized beverage production facilities.

Performance Metrics

Production Capacity

300 cans/min

Max Production Speed

Technical Specifications

Power Supply	380V, 50Hz
Operating Air Pressure	0.7 MPa
Can Diameter Range	50-80 mm
Can Height Range	80-150 mm

Features & Compatibility

Safety Systems

- Enclosed safety guarding
- Emergency stop functionality
- Touchscreen interface for safe parameter adjustment

Suitable Applications

Carbonated Beverages, Cola, Soft Drinks, Iced Tea, Juices, Processed Foods

Construction

Material

Stainless Steel
