

Automatic Rotary Liquid Filling Machine

This automatic rotary filling machine is designed for high-speed packaging applications. It features a stainless steel construction, rotary indexing system, and integrated control panel.

Product Overview

High-Speed Rotary Filling Solution

This automatic rotary liquid filling machine is engineered for high-speed packaging environments, offering precision and efficiency for various liquid products. Built with robust stainless steel, it features a rotary indexing system and an integrated control panel for streamlined operation. Designed to meet the demands of the food, beverage, pharmaceutical, and chemical industries, it ensures reliable performance with integrated safety guarding and ease of maintenance.

Technical Specifications

Construction Material	Stainless steel
Operation Type	Automatic rotary indexing

Applications

Suitable Industries	Food, Beverage, Pharmaceutical, Chemical
---------------------	--

Features

Key Features

- High-speed filling capability
- Rotary indexing system
- Integrated control panel
- Safety guarding included
- Easy cleaning and maintenance design
