Product Overview

DFJ-130 Sachet Filling and Sealing System

The DFJ-130 is a versatile automatic paste and liquid filling and sealing machine designed for efficient packaging. It features a robust PLC logic control system with an intuitive human-machine interface, ensuring high performance, stability, and easy maintenance. The system offers significant flexibility with adjustable bag lengths and customizable sealing specifications to meet various production needs.

Technical Specifications

Capacity

15 bags/min

Maximum Speed

Model Name	DFJ-130
Filling Volume	250 ml
Sealing Style	3 side sealing
Hopper Capacity	8.6 L

Physical Dimensions

Bag Size Range	Length: 50-200mm, Width: 65mm
Machine Dimensions	500 x 400 x 650 mm
Net Weight	39 kgs

Electrical Specifications

Power Rating	0.9 kW / 220 V
