

Automatic Sachet Filling Machine for Sauces and Peanut Butter

This automatic machine fills and packs viscous products like peanut butter and sauces into sachets. It provides efficient and reliable packaging solutions while maintaining product integrity.

Overview

High-Efficiency Sachet Filling Solution

This automatic sachet filling and packing machine is engineered for the precise packaging of viscous food products like sauces, peanut butter, and condiments. Featuring a robust SS304 stainless steel frame, it ensures durability and hygiene standards suitable for food processing environments. The system utilizes an integrated electric cutter and high-precision cylinder pump to deliver consistent, reliable performance for various sachet sizes.

Technical Specifications

Frame Material	SS304 Stainless Steel
Filling Mechanism	High-precision cylinder pump
Control Interface	PLC with Touch Screen
Cutter Type	Integrated electric cutter
Sealing Control	Separate intelligent temperature controllers
Parameter Storage	10 products

Capabilities

Key Features

- Plug and play design for quick setup
- Adjustable cutter position during operation
- Photoelectrical sensor for precise bag length tracking
- Anti-corrosion and easy-to-clean construction
- Parameter adjustments without suspending production

Compatible Products

Shampoo, Sanitizer, Tomato Paste, Chilli Sauce, Bath Cream, Soy Sauce, Chili Oil, Sesame Oil, Honey, Peanut Butter
