

Automatic Self-Cleaning Industrial Water Filter

This automatic self-cleaning filter is designed for industrial applications. Its programmable timer enables backwash cycles, ensuring efficient particle removal and minimal maintenance.

Product Overview

Industrial Automatic Water Filter

This automatic self-cleaning industrial water filter is engineered to maintain high efficiency in demanding filtration environments. Equipped with a programmable timer for automated backwash cycles, it effectively removes particles to ensure consistent system performance. Its durable construction is designed for long-lasting operation, making it an ideal choice for diverse industrial pumping setups.

Electrical Specifications

Max Power Capacity

1.1 KW

Lower Capacity

2.2 KW

Higher Capacity

Rated Voltage	110V/230V
Max Current	10 A
Frequency	50Hz/60Hz

Operating Parameters

Max Working Pressure	8 bar
Starting Pressure	1.5bar/2.2bar
Max Operating Temperature	60

Mechanical Details

Protection Grade

IP65

Joint Screw Size	G1"
------------------	-----

Application

Compatible Pump Types	Self-Priming Pump, Jet Pump, Garden Pump, Clarified Water Pump
-----------------------	--
