Overview

High-Efficiency Automatic Water Solution

This automatic self-priming water pump is engineered for reliable domestic water supply and pressure boosting applications. It utilizes an integrated electronic control system with flow and pressure sensors for seamless, on-demand operation. Designed for continuous duty, the unit features advanced protection against water shortages and thermal overload, ensuring long-term durability in residential and light commercial environments.

Performance Metrics

Flow Rate vs. Head Performance

Flow (L/min)	Head (m)
5	45
15	40
30	30
45	15

Key Operating Specifications

50 L/min

Max Flow Rate

50 m

Max Head

8 m

Suction Lift

0.75 kW

Motor Power

Technical Specifications

Electrical Requirements

- Voltage: 220-240V
- Frequency: 50/60Hz
- Continuous Duty Rated
- Thermally Protected

Protection Class

IPX4 • Water Shortage Protection • Automatic Detection

Inlet/Outlet Size

1 inch x 1 inch
