Overview

High-Efficiency Button Sewing Solution

This automatic button sewing indexer is engineered for high-volume garment production, specifically designed for attaching buttons to the under plackets of men's and women's shirts. The system integrates an automated fabric feeding mechanism with a high-precision button feeder to maximize throughput and consistency. By streamlining the sewing process, this machine significantly reduces labor requirements while maintaining professional-grade quality standards.

Performance & Capacity

Daily Production Capacity

3600 pcs/8h

Max Output

Sewing Range 620 mm

Minimum Sewing Range 320 mm

Technical Specifications

Automation Features

Automatic Button Feeding • Automatic Fabric Feeding • Automatic Workpiece Collection

Supported Button Types 2-hole buttons, 4-hole buttons
