

Automatic Shoe Cover Dispenser Machine

This automatic machine produces disposable plastic shoe covers. It utilizes roll feeding, precise cutting and sealing, and automated output for efficient production.

Product Overview

Efficient Shoe Cover Production

This automatic plastic shoe cover machine is engineered for the efficient production of disposable shoe covers in high-demand environments. Featuring a continuous roll feeding system, precise cutting and sealing mechanisms, and an automated output, it ensures streamlined operation and consistent quality. Constructed with a durable frame and stainless steel components, it is designed for longevity and meets the hygiene standards required for cleanrooms and medical facilities.

Technical Specifications

Construction Material	Stainless steel components with durable frame
Operation Mode	Automatic
Feeding System	Continuous roll feeding

Operational Features

Control Features

- Adjustable speed settings
- Adjustable cover size parameters
- Automated output system

Application

Suitable Environments	Cleanrooms, Medical Facilities, Hygiene-Controlled Areas
