

Automatic Shrink Wrapping Machine for Bottles and Cans

This shrink wrapping machine is designed for bundle packing of beverages, including beer, juice, and bottled water, with or without bottom support. It features a film letoff mechanism and constant tension film conveyor for instantaneous film cutting and automatic film connecting.

Product Overview

High-Speed Packaging Solution

The YCBS60 is a high-speed, continuous motion cartoning system engineered for precision and reliability. Designed to handle a diverse range of products, it features a robust construction and advanced servo-driven mechanisms. This solution offers seamless integration capabilities for complete packaging lines in food, pharmaceutical, and consumer goods sectors.

Performance

Max Production Speed

60 CPM

Cartons Per Minute

Operational Features

Continuous Motion, Servo-Driven, Automated Cartoning

Compatibility

Suitable Industries

- Food & Beverage
- Pharmaceuticals
- Cosmetics
- Consumer Goods

System Integration

Integration Point

Filling Machines
