Overview

Continuous Side Sealing Solution

The BSF-5545LE is a high-speed automatic side sealing machine designed for versatile packaging applications. It features a continuous sealing process without product length limits, making it ideal for irregular items across industries like food, pharmacy, and hardware. With an integrated PLC control system and safety-focused design, it ensures stable, precise operation at speeds up to 25 pieces per minute.

Performance Metrics

Key Operational Metrics

25 pcs/min

Max Packing Speed

1.8 kW

Power Consumption

6 kg/cm³

Min Air Pressure

Technical Specifications

Dimensions & Weight

Attribute	Value
External Dimensions	1680 x 975 x 1500 mm
Net Weight	290 kg
Max Sealing Length	450 mm
Max Packing Height	150 mm

Electrical Input 3 Phase 380V/50Hz, 3 Phase 220V/60Hz

Key Features

Machine Capabilities

- Continuous side sealing with no length limits
- PLC control system with alarm devices
- Automatic film adjustment via electric eye sensors
- Safety protection and anti-cut sensors
- Compatible with irregular product shapes

Suitable Industries

Food • Pharmacy • Hardware • Printing • Daily Necessities
