

Automatic Slack Adjuster for Air Brake Systems

Automatic slack adjuster designed for heavy-duty air brake systems. This adjuster automatically maintains proper brake shoe-to-drum clearance, ensuring consistent braking performance and reducing the need for manual adjustments.

Product Overview

Automatic Slack Adjuster for Heavy-Duty Air Brake Systems

This automatic slack adjuster is precision-engineered for heavy-duty air brake systems, ensuring optimal safety and performance. By automatically maintaining the correct clearance between the brake shoe and drum, it eliminates the need for frequent manual adjustments. Built with robust materials, this component is designed for long service life and reliability in demanding truck and trailer operating conditions.

Technical Specifications

Key Features

- Automatic clearance maintenance
- Consistent braking performance
- Robust construction
- Reduced maintenance requirements

Performance Metrics

1 Automatic

Adjustment Type

Durability

Heavy-Duty • Long Service Life

Application Compatibility

Heavy-Duty Trucks, Trailers, Air Brake Systems
