

# Automatic Sleeve Labeling Machine for Bottled Water

This automatic sleeve labeling machine utilizes advanced technology to apply circular labels on PET bottles. The labels are then heat shrunk to securely fit the contours of the bottle.

## ADDITIONAL IMAGES

## Product Overview

### Advanced Automatic Sleeve Labeling Solution

This automatic sleeve labeling machine utilizes international advanced technology to precisely apply circle labels to PET bottles. The system features a compact, modular design that integrates seamlessly into production lines of varying heights and directions. Its specialized cutter head and motor-driven height adjustment ensure reliable, high-speed performance for bottled water production.

## Performance Metrics

### Production Capacity

**100 b/min**

SLM-100 Capacity

**350 b/min**

SLM-350 Max Capacity

## Technical Specifications

### Model Specifications Table

Model	Capacity (b/min)	Dimensions (mm)
SLM-100	100	2400*950*2000
SLM-150	150	2400*1000*2100
SLM-250	250	2440*1000*2200
SLM-350	350	2440*1000*2200

## Material Compatibility

Compatible Label Materials	PVC, PET, OPP, OPS
Label Thickness Range	0.035 - 0.10 mm
Suitable Bottle Diameter	50 mm

## Key Features

### Mechanical Advantages

- Compact modular design for flexible installation
- Motorized height adjustment for easy material replacement
- Specialized cutter head for exact film-rolling cuts
- Integrated heat shrinking tunnel for secure label fixing
- Stainless steel construction for hygiene and durability

## Safety & Operation

### Safety Systems

Emergency Stop Buttons • Protective Enclosures • User-Friendly Interface
