

Automatic Small Bottle Blowing Machine

This automatic bottle blowing machine is designed for producing small plastic bottles. It features a high-speed blowing system, precise temperature control, and automated bottle ejection.

Product Overview

High-Efficiency Bottle Manufacturing

This automatic bottle blowing machine is engineered for versatility and high-volume production across various liquid packaging sectors. By utilizing interchangeable molds, the system supports diverse bottle designs suitable for beverages, dairy, oil, and household chemicals. With a focus on precision, it integrates advanced temperature control and automated processes to ensure consistent output quality.

Performance

Production Output

12000 bph

Minimum Capacity

81000 bph

Maximum Capacity

Applications

Industry Compatibility

Water, Fruit Juice, Carbonated Beverages, Dairy Products, Beer, Soy Sauce, Edible Oil, Daily Chemicals

Technical Specs

System Mode

Automatic

Material Type

PET
