

Automatic Speed Control Water Supply System

This system maintains consistent water pressure in various applications. It features intelligent auto-speed control, ensuring efficient operation and energy savings.

Overview

Intelligent Water Supply Solution

This automatic speed control water supply system is engineered to provide consistent water pressure for residential, commercial, and industrial applications. It integrates a high-efficiency pump, an intelligent controller, and an auto-speed driver to ensure optimal performance and significant energy savings. The system features a durable construction with a non-toxic rubber membrane pressure vessel, ensuring a safe and reliable water supply with minimal pressure fluctuations.

Technical Specifications

System Components

- Water pump
- Intelligent controller
- Integrated auto-speed driver
- Pressure tank
- Pressure switch
- Pressure gauge
- Flexible connecting pipe

Factory Pre-filled Pressure

0.12 Mpa
