

Automatic Spring Roll and Dumpling Forming Machine

This machine automatically forms spring rolls and dumplings. Dough is fed into the hopper, pressed into thin sheets, and shaped without damaging the gluten, resulting in wrappers with elasticity and a handmade taste.

Overview

High-Efficiency Food Forming Solution

This automatic forming machine is engineered for high-volume production of dumplings, spring rolls, samosas, and wontons. By utilizing double frequency conversion control and high-quality SUS304 stainless steel components, it ensures consistent product quality and hygiene. The system automates the entire process from dough sheeting and filling to final molding, significantly reducing labor requirements while maintaining the texture and taste of handmade products.

Technical Specifications

Model	FDAD1000
Voltage	380 V
Power	2.8 kW
Weight	860 kg
Machine Dimensions	2450 x 1050 x 1300 mm

Performance & Capacity

Production Capacity

22000 pcs/h
Output

Supported Product Weights

- 6-8g
- 12-14g
- 15-16g
- 18-20g
- 40-45g

Features & Versatility

Materials

SUS304 Stainless Steel • PU Conveyor

Suitable Environments

- Hotels
- Restaurants
- Cafeterias
- School Canteens
- Kindergartens
- Frozen Food Factories

Compatible Products

Dumplings, Spring Rolls, Wonton, Hotpot Dumplings, Pearl Dumplings, Samosa
