

Automatic Stainless Steel Foam Soap Dispenser

This automatic foam soap dispenser utilizes infrared sensor technology for touchless operation. The sleek, modern dispenser is made with a durable, corrosion-resistant finish and dispenses a consistent amount of foam soap to promote hygiene and reduce waste.

Product Overview

Touchless Hygiene Solution

This automatic foam soap dispenser utilizes advanced infrared sensor technology to provide a completely touchless handwashing experience. Crafted from high-quality stainless steel, it offers superior durability and a modern aesthetic suitable for high-traffic environments like commercial bathrooms and kitchens. Its efficient dispensing system ensures a consistent amount of foam with every use, effectively promoting hygiene while reducing soap waste.

Technical Specifications

Material	Stainless Steel
