Overview

High-Efficiency Packaging Solution

This automatic stand-up pouch packaging machine is engineered for reliable and efficient high-volume packaging. Constructed with durable stainless steel, it ensures optimal hygiene standards for various industries. The modular design allows for seamless integration with diverse filling systems, making it versatile enough to handle powders, granules, liquids, and solids with consistent accuracy.

Technical Specifications

Core Machine Features

- Film roll feeding system
- Integrated forming and sealing mechanisms
- Discharge conveyor
- Adjustable pouch size settings
- Variable fill volume control
- Customizable sealing parameters

Construction Material	Stainless Steel
Compatible Product Types	Powders, Granules, Liquids, Solids

Safety & Operation

Safety Equipment

Emergency Stop • Safety Guards

Operation Interface	User-friendly control panel
