

# Automatic Stuffed Bun Forming Machine

This automatic machine is designed for the efficient production of stuffed buns. It features dual hoppers for dough and filling, a forming mechanism, and a conveyor belt for output.

## Overview

### High-Efficiency Steamed Bun Production

This automatic bun forming machine is designed for professional food production, capable of processing meat-filled steamed buns with precision and speed. The system features adjustable dough and filling ratios to ensure consistent product quality, while the integrated cooling water circulation device helps maintain optimal dough texture. Constructed for commercial use, it combines a compact design with high output capacity to streamline your kitchen operations.

## Performance Metrics

### Production Capacity

**3000 pcs/h**

Max Output

**150 g**

Max Bun Weight

## Technical Specifications

Dimensions	1500 x 700 x 1450 mm
Machine Weight	340 kg
Power Rating	2.75kW, 220V

## Features

### Core Features

- Adjustable dough and filling parameters
- Frequency control system
- Cooling water circulation for improved bun skin texture
- Low speed double twist forming
- Even and consistent stuffing distribution

### Operational Advantages

Easy to Move • Smooth Surface Finish • Adjustable Size • Reasonable Design
