

# Automatic Submersible Sump Pump

This submersible pump is designed for efficient water removal in various applications. Its robust construction ensures durability and reliable performance.

## Product Overview

### High-Efficiency Submersible Pumping

The Q1CP-A3 submersible pump is engineered for efficient and reliable water removal in residential or commercial sump pits and basements. Featuring a rugged, durable construction, this unit provides long-term performance in environments prone to flooding. Its integrated automatic float switch ensures convenient, unattended operation by triggering the pump as water levels rise.

## Key Features

### Core Capabilities

- Automatic float switch activation
- Compact design for restricted spaces
- Robust construction for durability
- Submersible design

## Application

### Suitable Environments

Sump pits, Basements, Flood-prone areas
